Sustainability Victoria is the Victorian Government's lead agency on climate change. We are implementing solutions right now to slow, and ultimately reverse, Victoria's emissions path. Across the state, in every sector, we're showing Victorians how to secure a low carbon future.

Our vision for Victoria is a thriving community that uses resources wisely. We partner with government, business, industry, communities and householders to abate carbon at a local level. Our goal of 10 million tonnes of greenhouse gas reduction by 2010 focuses our activities. Programs to address efficient use of energy and renewable resources, and better management of waste, will ensure we deliver this goal.

We have clearly identified challenges within each sector, defining a portfolio of ten priority programs to lead our response:

1. Improve the energy performance standards of 14 appliances
2. Double sales of GreenPower renewable energy
3. Target commercial buildings to increase resource efficiency
4. Expand commercial and industrial resource recovery
5. Expand organic recycling in household and commercial sectors
6. Extend ResourceSmart business program to encourage sustainable business practices
7. Increase innovation with the Renewable Energy Support Fund
8. Expand solar hot water installations in households
9. Improve municipal waste recovery
10. Retrofit 750 homes with energy and water saving devices.

The challenge ahead is to cut Victoria's greenhouse gas emissions by 60 per cent by 2050. Our work has a vital part to play in securing a low carbon future for all Victorians.

维多利亚可持续发展局是维多利亚州政府应对气候变化的主要职能部门。我们现已采取措施来降低甚至最终扭转温室气体的排放。我们要在整个维多利亚州范围内，向人们展示如何实现一个低碳的未来。

我们的目标是促使人们更加聪明地使用资源，从而创造和谐繁荣的维多利亚州。我们与维多利亚州其他政府部门以及商业企业、工业企业、社区和家庭一起合作减少碳的排放量。我们的阶段减排目标是至2010年减少温室气体排放1000万吨。我们会更加有效地利用能源和可再生资源，更加有效地管理各种废弃物从而来实现我们的奋斗目标。

我们已经明确了不同部门面临的挑战，并制定了10大优先发展计划，它们是：

1. 完善14个领域的最低能耗标准
2. 绿色电力（可再生能源）销售翻番计划
3. 促进商业建筑更具资源效率
4. 扩大商业和工业企业资源回收和再利用
5. 扩大家庭和商业部门有机物循环利用
6. 扩展聪明利用资源商业计划
7. 发挥可再生能源支持基金作用促进创新
8. 推广太阳能热水装置的使用
9. 改善城市废弃物回收再利用
10. 完成 750户家庭节能节水设计翻新

当前的挑战是截止到2050年削减维多利亚州60%的温室气体排放，我们的工作对于为整个维多利亚州人民创造一个低碳排放的未来将起到关键作用。
